

Molicare Super

MoliCare Super features all the trusted MoliCare qualities, but it also has enhanced rapid absorption attributes. It is ideal for residents with very severe urinary and faecal incontinence and is ideal for overnight use. This is due to its extra-thick absorbent pulp mat combined with super absorbent core for faster absorbency rates.

Suitable for people with very severe urinary and faecal incontinence and also for highly dependent or restless patients; is also ideal for mobile people with moderate incontinence who need the maximum possible security; for extended overnight use.

All-in-one incontinence briefs with Dry Plus fluid distribution layer, odour neutralizing superabsorbent core and wetness indicator; complete non-woven covering on the surface; water-repellent inner anti-leak cuffs, body-shaped form with elastic leg gathers; complete elastic foil backing; refastenable adhesive tapes; provide reliable protection due to high absorbency, excellent moisture retention and extra leakage protection; the skin is reliably protected against rewetting.

Small 20" to 31" Bag of 28s

Med 32" to 47". Bag of 30s

Large 40" to 59". Bag of 30s
