Mobile

Mobile Super

The incontinence pants with the comfort of textiles

MoliCare Mobile pull-up pants look and feel like normal underwear, but offer the highest level of leakage protection. The product features tear open seams for simple easy changing as well as a soft, breathable textile backsheet for greater comfort.

Its 3-way protection system gives MoliCare Mobile extra-strong leakage protection. The unique DryPlus non-woven layer locks liquid rapidly away to keep the skin comfortably dry. The super absorbent materials in the pulp core guarantee fast fluid absorption. The soft, water repellent inner cuffs offer additional leakage protection at the sides.

Rehab Mart

MoliCare® Mobile

Suitable for urinary and faecal incontinence, especially in mobile patients; their ease of use makes them particularly suitable for use in toilet training; thanks to their all-around security and perfect fit, they are also suitable for the care of restless or mentally disoriented persons.

Product Types

MoliCare® Mobile

For moderate to severe urinary or faecal incontinence.

MoliCare® Mobile Light

Featuring a thinner core which is narrower in width for the discreet management of slight to moderate urinary or faecal incontinence.

MoliCare® Mobile super

MoliCare Mobile super pull-up pants are especially designed for very severe urinary and faecal incontinence.
