

MoliMed®

for Men

The discreet, anatomically shaped incontinence pad, specially designed for men

Description

MoliMed for Men is an anatomically shaped pouch which enables optimal hygienic management of slight urinary incontinence in male patients. Due to its material composition and its design form the pouch is comfortable to wear and give optimal skin protection.

Uses

For the management of slight urinary incontinence in men, e.g. after prostate surgery; especially suitable for those persons who are mobile and active.

MoliMed® for Men

Presentations

MoliMed® for men active

In a special pouch-shaped form to fit the contours of the body; ideally suited for the discreet management of slight urinary incontinence in men. Pack of 14s

MoliMed® for men protect

Anatomical V shape with inner anti-leak cuffs which form an elastic inner rim around the urogenital area to provide all-round protection; the specially designed absorbent core locks away even large amounts of fluid. Pack of 14s
