

MoliMed

Premium anatomically shaped for slight to moderate incontinence

The MoliMed range is designed for light to moderate incontinence. It may be inserted into underwear or securely fitted with Molipants elasticated net pants. The contoured shape of the MoliMed product range ensures a comfortable fit. It is specially designed for use in cases of stress incontinence. Features fluid distribution layer and super absorbent

DESCRIPTION

Absorbent cushion covered with a non-woven, water repellent facing to protect the skin and keep it dryer

Waterproof backing is air-active and very gentle on the skin

Integrated odour neutraliser prevents unpleasant odours

The compact shape, along with the elastic leg gathers provide a comfortable snug fit around the crotch area

The MoliMed range consists of high quality, reliable products designed and manufactured by medical experts. The features provide discreet protection, greater security and comfort for everyday living.

MoliMed Premium

USES

Especially designed for slight to moderate bladder weakness; also ideal for use following vaginal surgery or as a comfortable, leakproof maternity pad.

PRESENTATIONS

Absorbent pads with a Dry Plus fluid distribution layer and an odour neutralizing superabsorbent core; a non-woven top layer covers the entire surface, impermeable backside with a soft non-woven outer cover, which is breathable due to micropores; bodyshaped form with elastic leg gathers; offers high wear comfort with maximum protection against rewetting; can be fitted securely and discretely in the underwear thanks to a long adhesive strip
