

TENA Lady

The **TENA Lady** range is available in 4 absorbencies. The smallest is no bigger than a panty liner but much more secure. All **TENA Lady** pads contain unique **DRY Tech System™** allowing faster fluid acquisition and improved absorbency keeping the skin dry and wearer secure. They also feature **Odour Control™**; which inhibits the development of embarrassing smells.

TENA Lady Normal™ In common with the other models, TENA Lady Normal features **Odour Control™** and comes individually wrapped. Thanks to the **double absorption core** with super-absorbent granules, it provides excellent absorption even when losing more than just drops. The fully **breathable outer layer** allows air to circulate while offering optimum protection against leakage. This gives you an even fresher, drier feeling and it's better for you and your skin.

TENA Lady Extra™ provides extra absorption whilst remaining remarkably discreet. If you feel you need more protection and absorption because you lose voids of urine TENA Lady Extra could be the product for you. Also TENA Lady Extra features a special absorption technology with super-absorbent granules, Odour Control™; and comes individually wrapped.

Being the most absorbent TENA *Lady* variant, **TENA Lady Super™** can handle even big voids without anyone noticing. Features synthetic elastic edges that ensure a **superior fit** and greater comfort. **Increased absorption and retention capacity** ensure security and confidence in all situations. Features a special absorption technology with super-absorbent granules, and **Odour Control™**.
