

weight 9.8 pounds (4.4kg)

## *I weigh less than your cat.*

**No more worries about running out of oxygen ever again.  
No more relying on others for your oxygen supply.  
And no more deliveries.**

The INOGEN ONE is the first oxygen system designed to provide unparalleled freedom for the active oxygen user. With the INOGEN ONE, you'll no longer need separate pieces of equipment for home, portable, or travel use. Best of all, because it gets oxygen from the air around you, there are no gas or liquid tanks to fill. That means your INOGEN ONE will never run out of oxygen.

The INOGEN ONE is made to make your life easier. It's light enough to carry over your shoulder, and it comes with a cart to roll behind you when you're on the go. We like to think of it as a "polite companion", and since it's whisper quiet most people don't know it's running.

## *I can go wherever you want.*

Head home when you *want* to, not when your oxygen gauge says you *have* to. Restoring your freedom and control of your day is a big part of what makes the INOGEN ONE so special. You can power your INOGEN ONE by plugging it into a wall outlet, DC outlet in your car, or for hours at a time with the included battery. So go ahead, jump in the car to run errands or take a weekend trip to see family. Come and go as you want without having to switch equipment. Or take that long trip you thought you'd never again have the chance to take. The INOGEN ONE is made to follow you anywhere, whether it's around town, on the road, on a cruise, or in the air. Where you go is now up to you!

Speaking of air travel, many airlines now allow you to use the INOGEN ONE when you fly. Now you can take your oxygen with you, avoiding the hassle of arranging for oxygen at the airport with your provider and the expense of airline-supplied oxygen during flight. Visit [www.inogen.net/faa](http://www.inogen.net/faa) for a list of airlines that currently allow the INOGEN ONE.

# Oxygen. Anytime. Anywhere.

## AC Power Supply

When plugged in, the INOGEN ONE delivers an unlimited supply of oxygen.

## Mobile Power Charger

Use this to power your INOGEN ONE in your car, boat, or RV.

## Lithium Ion Battery

One battery lasts for up to three hours. When it's plugged in, the battery automatically recharges.

## Cart & Carry Bag

Designed specifically for the INOGEN ONE, take advantage of your new independence and mobility.

## Technical Specifications

**Weight** 8.31lbs (3.7kg) with Battery: 9.8lbs (4.4kg)

**Size** Length: 11.62" (29.51cm) Width: 6.00" (15.24cm)  
Height including handle: 12.39" (31.47cm)

**Oxygen Flow** Pulse dose delivery system. Five flow settings from 1-5

**Power Sensing** AC power supply 100-240V, 50-60Hz (auto sensing to allow worldwide use)  
Mobile Power Charger for mobile DC use (will recharge battery)

**Battery** Duration 3 hours\*, recharge approximately 3 hours with AC or DC power

**Noise Level** 37.4 Decibels\*

**Warranty** 3 year limited warranty\*\*

**Operation** Simple control functions and easy-to-read LCD display

**Use** Stationary, portable and travel. Clinically effective for day and night use.

\* At setting 2, in typical home use.

\*\* See limited warranty statement for complete details.
